

Area of Focus	Glass
Current Status (in general, and specifics for residential and commercial customers as applicable)	Currently glass is not collected curbside with-in Tucson city limits. Commercial and residential customers must drop off glass at one of the twenty-two drop off sites. This glass is shipped to Phoenix and crushed into sand. The city of Tucson receives a portion of the product and proceeds.
What is the ideal scenario, and what are the limiters?	<p>If glass returned to curbside pick-up for residential and commercial customers to be crushed by a city owned commercial sized crusher. The city could keep all of the product and proceeds.</p> <p>Standardization of glass containers, which would allow for cleaning and reuse without the need to be processed.</p>
Our Club's Public Message on this Area of Focus	<p>Glass Roots program of recycling.</p> <p>Support local businesses who reuse glass containers.</p>
Actions our Club Can Take	<p>Advocate to have the city purchase a commercial crushing machine</p> <p>Advocate reuse of glass for home and commercial use.</p>
